Open 'Before' Open 'After'

Populating the List Box:

```
private void populateListBox(IEnumerable<MediaEntry> mediaEntries, ItemsControl box)
{
    foreach (MediaEntry entry in mediaEntries)
    {
        box.Items.Add(entry.ToString());
        _mediaDict.Add(entry.ToString(), entry);
    }
}
```

Play Selected Media:

```
private void ListBoxMainWindowRecentlyPlayed_MouseDoubleClick(object sender, MouseButtonEventArgs e)
{
    IList selected = ListBoxMainWindowRecentlyPlayed.SelectedItems;
    var s = selected[0] as string;
    if (s != null)
    {
        MediaEntry selectedEntry = _mediaDict[s];
        MediaElementMainWindow.loadMediaEntry(selectedEntry);
        MediaElementMainWindow.Play();
        //MessageBox.Show(selectedEntry + " selected.");
    }
    else
    {
        throw new TypeAccessException("selectedValue is not a string");
    }
}
```

MediaElement Extensions:

```
using System;
using System.Windows.Controls;

namespace FinalProjMediaPlayer.Extensions
{
    public static class MediaElementExtensions
    {
        public static void loadMediaEntry(this MediaElement ele, MediaEntry entry)
        {
            ele.Source = new Uri(entry.FilePath);
        }
    }
}
```
